

CREATE REAL-TIME, INTERACTIVE SURVEYS
IN YOUR CONFERENCE ROOM!

EASY VOTE

EasyVOTE is a wireless interactive voting system designed to make your meeting more dynamic. Ask a multiple-choice question and your attendees can vote using wireless keypads, with the results displayed on screens.

IMPROVE ATTENDEE INTERACTIVITY

INVOLVE YOUR GUESTS IN DECISIONS MAKING

BRANDED INTERFACE

Audience Q&A sessions can be long and inefficient – waiting for the microphone, non-answered questions, off-subject remarks...

EasyVOTE improves the interactivity between the speaker and the audience. The organiser prepares a series of key questions based on yes/no, true/false or multiple choice and asks them to the attendees.

With personal voting keypads, each member of the audience can submit their answers anonymously. The results are instantly calculated by easyVOTE and displayed on the screen.

The system can also handle votes by SMS, email or online messaging, enabling audiences to take part even if they are in different rooms!
